DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to an aqueous peracid treatment composition comprising a peracid and a surfactant, classified in class 252, subclass 186.26.
 - II. Claims 10-23, drawn to a process for removing an inorganic soil composition from a surface, classified in class 510, subclass 401.
 - III. Claims 24-57, drawn to a process and odor component from a gaseous effluent, classified in class 423, subclass 210.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of use together, since the process of claim 10 does not require that the aqueous solution contain a peracid composition as required by the composition of claims 1 and 5.
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of use together, since the process of claims 24 and 43 does not require that the aqueous solution contain a peracid composition as required by the composition of claims 1 and 5.

Art Unit: 1754

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, since claim 10 is directed to removing an inorganic soil from a surface and claims 24 and 43 are directed to the removal of an odor or soil from a gas.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Groups I, II, and II are different, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
